

Reach New Heights with Caplugs

Protective Caps & Plugs | Masking Solutions | Hydraulic Component Protection | Electronic Connector & Component Protection

For more than 65 years, Caplugs has been the leader in product protection with innovative plastic and rubber molded components that solve industry-wide challenges for the aviation market. We have over 12,000 standard products that include plastic caps and plugs, netting, tubing, masking products, hose protection and other molded components.

If one of our 400 million parts in stock doesn't meet your needs, a dedicated team of in-house design engineers will collaborate with you every step of the way to develop a custom part to fit your exact requirements. We offer a wide range of molding processes, hundreds of material options and a stringent, certified quality management system.

As a global manufacturer with a world-class sales and service team, Caplugs is your trusted source for plastic component solutions you can rely on.

Caplugs has been serving the MRO and OEM customers in the aviation industry since 1948. We don't just sell parts – we're here to ensure your needs are met with the **right part** that protects your product or component during shipment, storage, assembly, repair, refurbishment and finishing processes. Caplugs' vast molding capabilities, aviation industry expertise and global reach make us an **ideal partner** and single source for all of your molded component needs.

aviation solutions made easy

Aviation Made Easier Solutions

most comprehensive product line and custom molding capabilities

- Over **12,000** parts in stock and ready to ship
- Broad range of product **styles, sizes** and **materials**
- Most extensive in-house **custom** capabilities
- Stringent quality management system to ensure **consistent quality**
- Full **PPAP** and **FAIR** compliance
- Wide variety of products that are **MIL/NAS** spec compliant

Caplugs parts are used in a wide variety of aviation applications by OEMs, tier suppliers and MROs. While the possibilities for product protection are nearly endless, here is a sampling of the types of protection Caplugs provides:

- Protect open ports from FOD
- Cushion delicate threads
- Protect hydraulic hoses for longer life
- Hydraulic valve protection
- Finishing parts for high visibility
- Tube and duct protection
- Wing and landing gear protection
- Stud protectors
- Bearing protectors
- Assembly guides
- Masking caps, plugs, tapes and discs
- Window masks for stripping and painting
- Edge liners
- Grommets

Masking Solutions

- Caps and plugs
- Tapes and discs
- Custom die-cut shapes
- Kit assemblies

Protective Parts

- Caps
- Plugs
- Netting

Electronic Connector and Component Protection

- Conductive
- Static dissipative
- Non-sloughing

High performance materials are used in our molded components to offer parts that are fire retardant, conductive, UV resistant, chemical resistant and more.

Hydraulic Component Protection

- Rubber seals
- Valve and fitting protection

With 6 different processes to work with, we can select the one to most effectively and cost efficiently meet your specific needs.

Full in-house capabilities include:

- 3D modeling
- Rapid prototyping
- Advanced tool room
- 15 SolidWorks stations
- 3,000 production-ready custom molds available

We have **thousands of certified materials** to meet your performance needs, and our full staff of in-house engineers can also formulate and mix a custom compound for specific performance attributes and characteristics.

Molding Processes

injection molding

vinyl dip-molding

extrusion

vinyl coating

compression molding

transfer molding

we're built for aviation

We understand the needs of the aviation industry and look forward to helping you soar with:

- > 24/7 customer support
- > Onsite visits from local sales team
- > 99% on-time delivery
- > JIT shipping if needed
- > EDI inbound and outbound documentation with third-party system
- > Advanced shipping notice
- > Inventory programs based on your planning documents
- > Quick quote turnaround
- > Fast turnaround on rapid functional prototypes

quality management system

Caplugs' stringent quality management systems ensure the necessary process controls to provide our customers with consistent, quality products.

Our Production Part Approval Process (PPAP) and FAIR compliance are important components of a comprehensive quality management system that provide traceability, record retention and strict process controls to ensure aviation supplier specifications are met.

- New York, Pennsylvania, Shanghai and Hangzhou, China facilities certified to ISO 9001 and ISO/TS 16949
- California and Texas facilities certified to ISO 9001
- New York, Pennsylvania, California, Shanghai and Hangzhou, China facilities certified to ISO 14001
- New York facility has a Class 8 clean room with an ISO 13485 certified quality management system

Over **400,000,000** parts in stock.
Over **10,000,000** parts produced per day.
Over **12,000** standard parts.
Over **200** molding machines.
Over **15** engineers.
6 global manufacturing facilities.
The **1** partner you need.

Let our engineers collaborate with your team to develop unique solutions that meet your needs. To fully support our customers, we not only offer you a variety of custom molding capabilities, we have built an infrastructure that enables us to step in at any stage of your process.

Comprehensive Collaboration

Our team takes you from R&D to prototyping through full production.

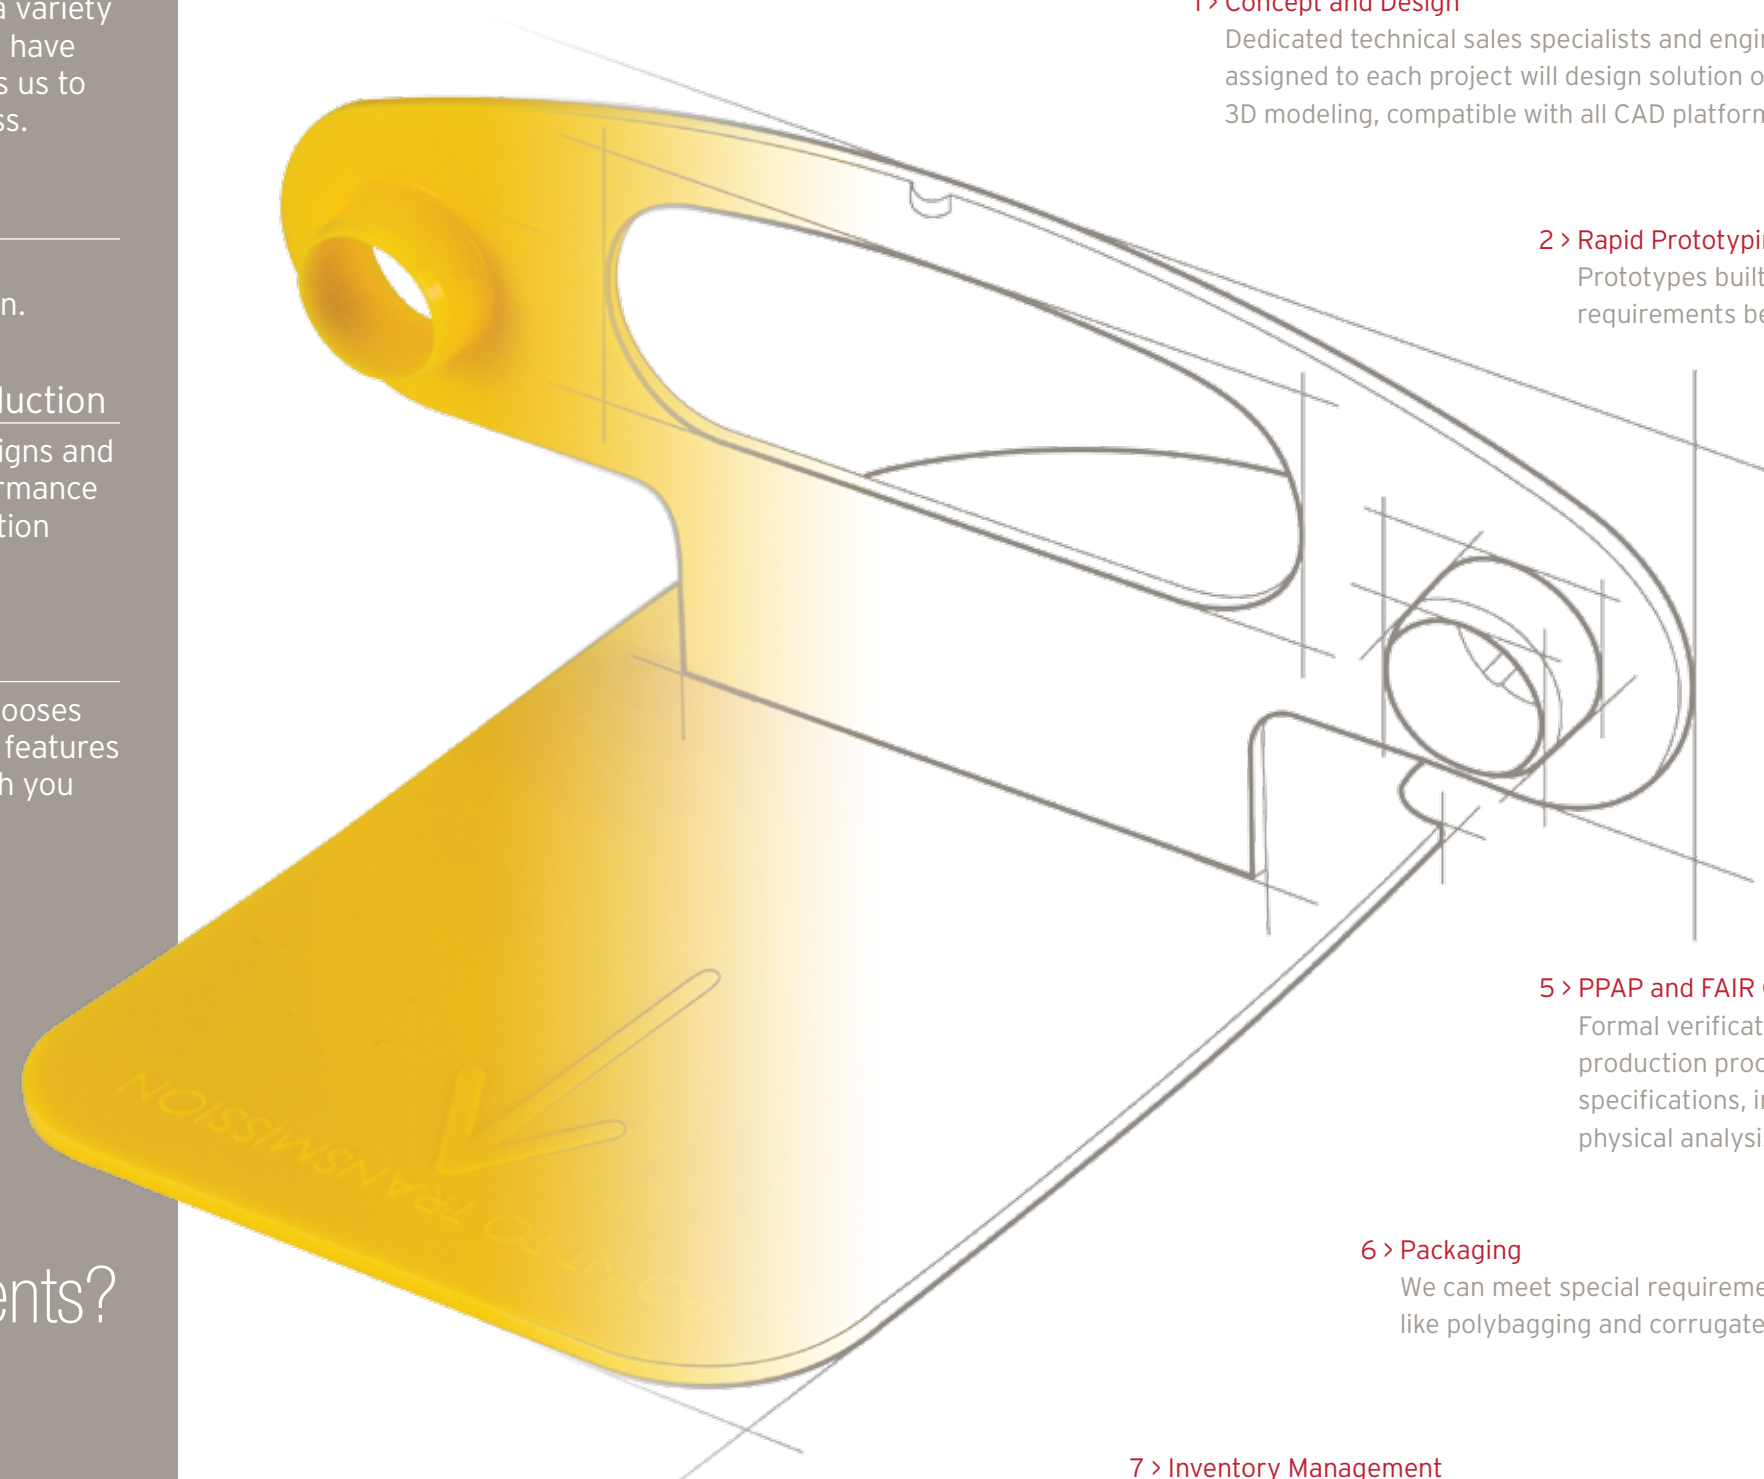

Design Consultation and Production

Our team reviews your team's designs and offers recommendations on performance features, such as material, installation ergonomics and more.

Production Only

Your team develops the design, chooses the material and finalizes all other features of the part. Our team partners with you for production.

“Need a unique shape? Size? Color? Material? Process requirements? We can help.”

caplugs comprehensive in-house process

1 > Concept and Design

Dedicated technical sales specialists and engineers assigned to each project will design solution options with 3D modeling, compatible with all CAD platforms

2 > Rapid Prototyping

Prototypes built in-house confirm fit requirements before production approval

3 > In-House Tool Fabrication

Molds made in-house for greater process control, shorter lead times and easier modifications

4 > Full Production Capability

From small volume runs to millions of parts

5 > PPAP and FAIR Compliance

Formal verification that part design and production processes comply with all your specifications, including chemical and physical analysis and full lot traceability

6 > Packaging

We can meet special requirements like polybagging and corrugate-free

7 > Inventory Management

We can inventory parts for JIT, Kanban and other warehousing requirements

selector guide

protective caps and plugs

- > Wide selection of standard protective parts ideal for the aviation industry
- > Prevent FOD and damage during shipping and storage
- > Available in various materials, including plastic, vinyl, aluminum and more
- > Available in standard carton and Mini Pak quantities

We can die-cut corrugated cardboard into any shape for an inexpensive packaging solution.

Hydraulic Component Protection

Aluminum caps with butyl disc inserted for sealing Skydrol and hydraulic fluids

Stud Protection

Manufactured in a performance material that is flame retardant

Vinyl Caps

Vinyl caps produced in fire retardant material and double dipped for easy installation and removal

Vinyl Dipping

Tool dipping allows us to vinyl coat racks, tools and any other metal pieces for a cushioned finish in a variety of colors

HEX Series

Hexagonal caps are designed to protect hex-style bolts or nuts from damage and contaminants. A dual bead feature allows parts to securely lock in place.

FUF Series

Plastic caps are designed to protect tube fittings in high vibration hydraulic systems typically found in aerospace and military aviation applications.

AS138 Series

Electrical connector dust caps protect circular electrical connectors. This part is the only line of caps in the industry that meets the new SAE aerospace specification AS85049/138.

AIR-SH Series

Kiss-cut crepe paper or aluminum masks for aircraft windows to safeguard them by forming an impenetrable barrier against chemical action. The masks are pre-cut to aircraft window sizes from high-quality pressure sensitive aluminum foil.

Caplugs is the leader in product protection with manufacturing locations and sales representatives all over the world to serve every customer efficiently.
